

## BASIC INSTRUMENT LIST: PHILIPPINE DISTRIBUTORS AND BRANDS – CHECK PRICING WITH YOU SUPPLIER

PLIERS	GAC / APAC	JRLT	ORDENT	Leone	ORMCO
1. Weingardt Utility Plier	P4,305.00	P4,500.00	P1,800.00	P8,800.00	P9,500.00
2. Pin & Ligature cutter	4,305.00	4,500.00	1,800.00	8,800.00	9,500.00
3. Distal End cutter	7,245.00	4,500.00	1,800.00	8,800.00	9,500.00
4. Ligature director	635.00	1,350.00	800.00		2,100.00
5. Posterior Band Removing plier	5,565.00	4,300.00	1,800.00	8,000.00	8,300.00
6. Heavy Duty Band pusher	-	1,350.00	800.00	-	-
7. Bite stick	-	500.00	500.00	-	1,250.00
8. Mathieu plier	950.00	4,500.00	1,800.00	5,000.00	8,500.00
9. Debonding Plier	4,305.00	4,500.00	1800.00	8,000.00	9,500.00
10. Bracket gauge	-	2,800.00	-	-	9,200.00
11. Bracket holder	500.00	850.00	950.00	-	3,250.00

ADHESIVES	GAC / APAC	MASEL	ORDENT	ORMCO	
1. Ortho 1 (GAC) Self cure / Light Cure	3,860.00				
2. Pulpdent OBA kit					
3. System 1+ (self cure)				4,800.00	
4. Enlight (Light cure)				4,000.00	

### OPTIONAL PLIERS:

1. Ribbon Arch pliers
2. Nance forming plier
3. Arch forming plier
4. Turret
5. Lightwire plier
6. Omega loop forming plier
7. 139 or bird beak plier

### WARRANTY:

- a. JRLT – Lifetime sharpening (no replacement)
- b. ORDENT – 2 months warranty
- c. ORMCO - 1 month warranty
- d. APAC – 3 years

#### BRAND NAME OF PLIERS – DISTRIBUTOR

- Feldon – Ordent
- TASK – APAC
- Masel Stainless Steel – JRLT
- ETM and AEZ – AVM ORTHO

## **BASIC ORTHODONTIC PLIERS**

**WEINGARDT PLIER** – An all-purpose utility plier. All stainless steel construction with finely serrated beaks for firm grip and longer wear.

**PIN and LIGATURE CUTTER** - Diamond-honed with tool steel wedges. Will cut ligature up to .016

**DISTAL END CUTTER** – Designed to cut archwire flush to Buccal tube leaving no protrusions. Holds loose distal wire fragment; preventing it from flying into tissue (small safety hold)

**LIGATURE DIRECTOR** – four design features ligature "tie-pin" tips on the end; ligature tucking on other end. All stainless steel construction.

**POSTERIOR BAND REMOVER** – Replaceable nylon cushion tips allows for easy band removal and maximum patient comfort. All stainless steel construction.

**HEAVY DUTY BAND PUSHER** – Stainless steel with finely serrated point. Designed for effective control while pushing, burnishing or eating bands Specially treated serration provide firm grip during use.

**BITE STICK** – multipurpose seater with hardened stainless steel tip. Molded handle also serves as bite stick.

**MATHIEU NEEDLE HOLDER** - Mathieu style needle holder with serrated tips. Positive locking permits instant opening and closing. Very useful in ligating 5" long (Narrow wide tip)

**DEBONDING PLIER** – Designed for long life and ease in removing direct bond bracket. The 60 degree angle allows access to anterior and posterior

**BRACKET GAUGE** – This unique gauge is placed on the occlusal / incisal surface of tooth simplify bracket positioning. Measures 3.5mm, 4mm, 4.5mm, 5mm.

**BRACKET HOLDER** – Easy release of both metal and plastic direct bond brackets. Features spring loaded reverse action to hold brackets until release is desired. Works with all twins and single brackets. (Fits to narrow to wide twin.)

**HEAVY DUTY PLIER** – Super tough cutting edges and unique joint design are ideal for cutting face bows and other heavy wires. Features hard chrome finish And soft vinyl grips. Maximum cutting capacity: Wire up to .080".

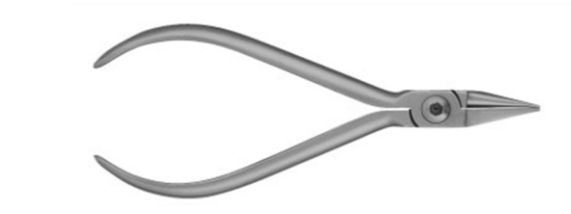

**NANCE LOOP FORMING PLIER** - Four steps (3, 4, 5 and 6mm) allow precision loop forming. Serrated beak on one side prevents wire slippage. Carefully beveled edges prevent wire scoring. Utility groove at the base of beak for closing formed loops. Wire up to .022".

**ARCH FORMING PLIER** - Short plier which provides extra precision in the handling of square and rectangular wires.

**ARCH-FORMING TURRET** - This turret combines a 5-groove and a 7-groove sleeve. The five-groove sleeves accommodates .017 and .018 wires in degrees. Torque and .019, .020 and .0215 wires in 7 degree torque. The seven-groove is for forming flat arches .016 through .022, 0 degree torque.

**LIGHT WIRE PLIER** - Long and more gradually tapered beaks than 139, this plier is designed for round wires up to .020". The longer beaks make it easier to bend small diameter loops. The cone beak is precision ground to .025" at the tip and has 9 degree angle ground on the sides to allow for wire spring back. The working edges are carefully beveled to prevent wire scoring.

**TWEED LOOP FORMING PLIER** - Ideal for forming loops and helixes in both round and rectangular wires up to .025".

**BIRD BEAK PLIER (139)** - Round and flat beaks permit bonding of round and rectangular wires up to .036" can also be used to form springs.
